

[Accredited by NBA for 3 years, 3rd Cycle Accreditation w.e.f. 1st July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET-Autonomy Scheme - 2019

#### **Payroll Management System**

Submitted in partial fulfillment of the requirements

of the degree of

**BACHELOR OF ENGINEERING** INFORMATION TECHNOLOGY (A.Y. 2021-2022)

by

Inaaya Khan (44) Aman Singh (65) Anmol Goyal (66)

Under the Guidance of Mr. Rahul Neve

Assistant Professor, I.T Department, TCET

**Choice Based Credit Grading System with Holistic Student Development** (CBCGS-H 2019)

Zagdu Singh Charitable Trust's (Regd.)

#### THAKUR COLLEGE OF ENGINEERING &

Autonomous College Affiliated to University of Mumbai Approved by All India Council for Technical Education(AICTE) and Government of Maharashtra

Institute Accredited by National Assessment and Accreditation Council (NAAC), Bangalore# Programmes Accredited by National Board of Accreditation (NBA), New Delhi\*

Conferred Autonomous Status by University Grants Commission (UGC) for 10 years w.e.f. AY 2019-20

Amongst Top 200 Colleges in the Country where Ranked 193<sup>st</sup> in NIRF India Ranking 2019 in Engineering College category

\*Permanent Affiliated UG Programmes : • Computer Engineering • Electronics & Telecommunication Engineering • Information Technology (w.e.f. A.Y. 2015-16)

• Electronics Engineering (w.e.f. A.Y. 2017-18)

\*3rd cycle NBA Accredited UG Programmes : • Computer Engineering • Electronics & Telecommunication Engineering • Information Technology (3 years w.e.f. 01-07-2019)

# 1st cycle of NAAC Accreditation : • "A" Grade for 5 years (w.e.f. 30-10-2017)

## Certificate

This is to certify that Ms. Inaaya Khan, Mr. Aman Singh, Mr. Anmol Goyal arebonafide students of Information Technology Department, **Thakur College of Engineering and Technology (An Autonomous College affiliated to University of Mumbai),** They have satisfactorily completed the requirements of **PS V PROJECT** as prescribed by the University of Mumbai, while working on .

## **ACKNOWLEDGEMENT**

The success and final outcome of this project required a lot of guidance and assistance from many people and we are extremely privileged to have completed the project successfully. We would like to thank everyone for their guidance.

We sincerely thank our Principal, Dr. B. K. Mishra, Vice Principal, Dr. Deven Shah Mentor Dean, Dr. Kamal Shah and HOD, Dr. Bijith Marakarkandy for always encouraging us to do our best. We are highly indebted to our guide Mr. Rahul Neve sir who supported and constantly supervised us through this project and helpedus in not only completing this project but also provided us with sample amount of knowledge that was really beneficial to us.

We are thankful to and fortunate enough to get constant encouragement, support and guide from all teaching staff of IT Department who helped us in successfully completing our project work. Also, we would like to extend our sincere thanks to all staff in laboratory for their timely support.

#### **ABSTRACT**

Payroll Management System is designed to make the existing manual system automatic with the help of computerized equipment and full-fledged computer software, fulfilling their requirements, so that their valuable workforce data and information can be stored efficiently for a longer period with easy access and manipulation of the same. The required software is easily available and simple to use. It can maintain and view computerized records without storing any redundant entries or overlapping repetitive data. The project describes how to manage employee data for good performance and provide better record tracking services for the admin.

#### **INTRODUCTION:**

The proposed project and Payroll Management System has been developed to overcome the problems faced in the practice of maintaining a manual system. This software is built to eliminate and, in some cases, reduce the hardships faced by the existing system. Moreover, this system is designed for a particular need of the company to carry out its operations in a smooth and effective manner. This application is reduced as much as possible to avoid errors while entering data. It also provides error message while entering invalid data. It is user-friendly as no formal knowledge is required to use the system. Human resource challenges are faced by every organization which has to be overcome by the organization. Every organization has different employee and payroll management needs. Therefore, we have designed this exclusive Payroll Management System - PayMint, that is well adapted to the cater to the various departments found in an organization.

#### **TECHNOLOGIES USED:**

- Visual Studio ASP.Net 2019
- C# Language
- SQL-Server Database

#### **DESCRIPTION**

#### **Existing System:**

- The current system is totally manual.
- Maintain all data records in on paper.
- Due to manually process, it requires more time for completion of any work.
- Lots of time consumed to the requires is difficult and time consuming.
- Manual system takes more time to complete any task.
- This system require more human resource to run the system.
- Require infrastructure to operate the system
- View past reports task is very tedious.

#### Need for New System:

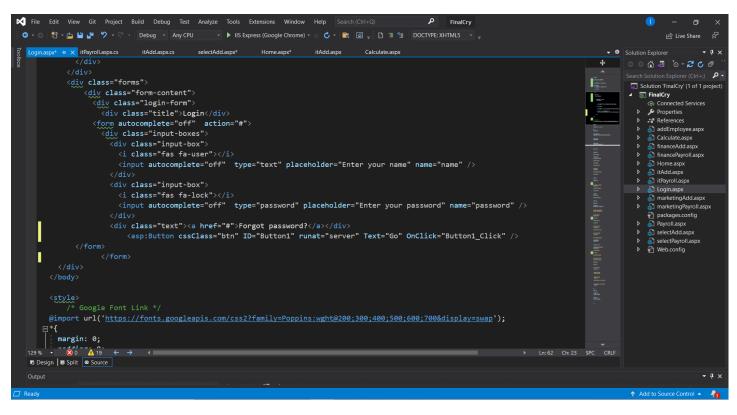

- This System required less time for processing.
- Reduce paper work and paper cost.
- Reduce the infrastucture cost.
- Easily generate and maintain the reports
- Various details provid to the management at any time.
- Better Security.
- The System require less human resource.

Choice Based Credit Grading System with Holistic Student Development [CBCGS - H 2019] Under TCET-Autonomy Scheme - 2019

#### **RESULTS & DISCUSSION:**

- We learnt C# language.
- We have design our project using ASP.Net Visual Studio 2019.
- We learnt about uses of database, importance of database and how to create database.
- We learnt how to create a site and input output data.
- We encountered different difficulties and problem which were then solved gradually.
- At last we developed a confidence and happiness after creating of something on our own.

#### **CONCLUSION:**

We successfully made a project that allows management of employee data and provides better payroll tracking for the admin. This project is built keeping in mind that it is to be used by only one user that is the admin. It is built for use in small scale organization where the number of employees is limited. According to the requested requirement the admin can add new employees in various departments. The Admin can also calculate predefined pay grades for the employees, with the addition of overtime wage. The required department records can be easily viewed by the admin anytime time he wants in an instant. The payment of the employee is based on monthly basis. This amount can be calculated using the paycheck calculator. The main objective of this framework is to save time, make the system cost effective and management records efficiently.

## **FUTURE SCOPE:**

- The option to print the records in future.
- We intend to add a leave structure in the future.
- We would like to implement a regular backup mechanism to back up the employee database to avoid disasters.
- The system can be developed in such a way that its existing features can be modified to better versions.
